

Infatica SDK Privacy Policy

Last updated: July 15, 2025

Infatica Pte. Ltd. (“Infatica”, “we”, or “us”) is the owner and operator of the Infatica SDK (“the SDK”), along with related websites, software tools, services, and technologies offered by us (collectively, “the Services”). This Privacy Policy describes how we collect, use, and protect information processed through the SDK when it is embedded in a host application.

By using an application that incorporates the Infatica SDK, or by otherwise interacting with our Services, you (“you” or “user”) acknowledge and accept the practices described in this Privacy Policy. This document forms a legally binding agreement between you and Infatica. If you do not agree with any part of this Privacy Policy, please discontinue use of the Services and uninstall the host application.

We recommend reviewing this policy periodically, as we may update it from time to time to reflect changes in legal, operational, or technical requirements. Your continued use of the Services following any updates will constitute acceptance of the revised terms.

1. Infatica SDK – Data Practices & Network Participation

- No personal data is collected, stored, or shared. We do not access your name, email, contacts, browsing history, or app usage.
- No permanent device identifiers. We do not use hardware IDs or any other persistent identifiers.
- No tracking across apps or websites. We do not place cookies or persistent tracking technologies.
- Bandwidth sharing (opt-in only). With your consent, the SDK uses a small portion of your unused internet bandwidth to securely route

public web data for Infatica's enterprise clients. By opting in, your device becomes a peer node in the Infatica network, contributing limited network resources (bandwidth and IP address). In return, you may receive incentives—such as ad-free experiences or premium features—at the discretion of the app developer.

Technical, non-personal data processed may include:

- Device type and OS type
- SDK version
- General location (country- or city-level, derived from IP)
- IP address (for operational purposes)

Aggregated analytics:

- We may generate and use aggregated, anonymized IP-based statistics (e.g., bandwidth availability by city or ISP). These analytics do not identify any individual user and may be shared with trusted partners for infrastructure planning, research, or performance optimization.

All SDK operations comply with GDPR, CCPA, and applicable app store requirements.

2. Legal Basis for Processing

We process data on these grounds:

- Contractual necessity – to deliver core SDK functionality you've agreed to.
- Legitimate interests – to secure our network, prevent misuse, and improve service reliability.
- Legal obligations – to comply with data protection laws, consent record-keeping, and other regulatory requirements.

3. Sharing and Disclosure of Information

We may share data in these circumstances:

- Service providers & affiliates. Subsidiaries, affiliated companies, or trusted third-party partners may process data on our behalf for cloud storage or secure processing; operational support and authentication; diagnostics, analytics, or statistical purposes. All third parties are bound by agreements that require them to protect your data.
- Legal or security reasons. We may disclose information if we believe in good faith it is necessary to: 1) comply with laws, regulations, subpoenas, or court orders; 2) prevent or investigate fraud, security threats, or technical issues; 3) enforce our policies, terms, or investigate breaches; 4) protect the rights, property, or safety of Infatica, its users, affiliates, or the public
- Business transfers. In the event of a merger, acquisition, or sale of assets, any transferred data will remain subject to this Privacy Policy.

4. Responsibility of Host Applications

Infatica provides the SDK to application developers (“Host Applications”) with the expectation that they implement it in full compliance with applicable data protection laws, including but not limited to the GDPR, CCPA, and relevant app store policies.

Infatica shall not be held liable for any misuse, unlawful integration, or failure by Host Applications to obtain appropriate user consents or provide required disclosures to end users.

Each Host Application is independently responsible for:

Informing users clearly and transparently about SDK functionality (including bandwidth sharing, if applicable);

Obtaining valid, informed consent for any SDK-based features that rely on user authorization;

Implementing technical safeguards and permissions properly.

Infatica disclaims any liability arising from a Host Application's failure to meet these obligations. Infatica reserves the right to terminate SDK access for any Host Application that fails to comply with these requirements or causes reputational, legal, or security risks to Infatica or its users.

5. User Rights & Contact

You may withdraw consent and stop participation at any time by disabling the SDK in the app's settings or uninstalling the application.

For inquiries, access requests, or deletion requests related to data processed by the SDK, contact us at: info@infatica-sdk.io
